Dyeing/Wash Specialist – Location: OH; **Salary:** N/A; Abercrombie & Fitch is currently seeking a Dyeing/Wash Specialist to be responsible for many of the color related programs conducted within the Wet Processing Research Laboratory. Under the direction of the Dyeing/Wash Manager, the Dye/Wash Specialist will work on processes, procedures and execution of color and wash standards to assist in ensuring color consistency within Abercrombie & Fitch programs. Additional responsibilities include providing technical support and guidance to both internal (design, merchants, sourcing, quality assurance) and external (mills, laundries, vendors) business partners.

ESSENTIAL DUTIES & RESPONSIBILITIES:

- Develop color primaries for calibration of color formulation software
- Conduct laboratory dyeings for the creation of color standards
- Research new dyeing and/or garment washing techniques
- Maintain technical information database of dye/chemical properties
- Provide technical support to internal and external business partners related to dye/wash issues
- Establish “robust” dyeing processes, standard operating procedures and ensure proper documentation
- Ensure proper cleanliness and organization of dyeing laboratory

REQUIRED QUALIFICATIONS:

- 1) Knowledge, skills, and abilities
 - Discerning color eye with good to excellent color vision as determined by the Munsell-Hue Color Vision Skills Test.
 - Ability to analyze color using a light booth and a spectrophotometer
 - Comprehensive understanding of textile dyes and chemicals (including application procedures and processes)
 - Proficiency in Microsoft Office applications (Word, Excel, Powerpoint); Proficiency in color technology software for color matching and quality control a plus.
 - Excellent time management skills
 - Excellent verbal and written skills. Strong command of the English language
 - Self-motivated, detailed, and customer-service oriented
 - Excellent decision making ability/display
 - Bachelor’s Degree in Textile Chemistry or Color Sciences
 - 1-3 years in the textile wet processing industry or related color technology industries
